Notary Services Made for Business

How a digital notary platform can help you save
time and capitalize on new revenue streams.

About NotaryPro

Founded by a lawyer with a passion for innovation, NotaryPro is the trailblazer behind Canada's first remote online notarization (RON) platform. Since 2016, our rapidly expanding team has served over 350,000 clients across Canada and worldwide — including over 1,000 corporate clients. We also operate the nation's largest, top-rated network of in-person notary services, with 300+ locations.

What is a Notary?

A notary public is authorized to witness the signing of important documents and administer oaths and affirmations. A notary public may be a lawyer, paralegal, judge, or other authorized official.

The primary purpose of a notary public is to prevent fraud by:

- Verifying the identity of a person signing a document
- Ensuring a person swears or affirms they're telling the truth
- Confirming that the person is of sound mind and is signing willingly

In today's digital world, fraud prevention is more important than ever — and fortunately, online notary services are now legal in Canada.

This is after the enactment of new legislation on May 2, 2020 where the Government of Ontario amended the Notaries Act, under Bill 190, which establishes **that a notary public may “exercise his or her powers with or without being in a person's physical presence”**.
